

Mathis Zerbib

Fullstack

I am a French engineer specialized in Full-Stack development, currently looking for a **work-study contract** to integrate a **master of application developer, architect**, in the school **EPITECH** in **Montpellier**. I have completed more than 10 web or software projects thanks to my professional experiences and my studies. I tend to always learn more about computer science, to improve my skills and to stay on top of new technologies.
